

SECURE YOUR DATA WITH A LexID Append

A unique and persistent identifier for your valuable constituent data

Minimize data liability by replacing the highly sensitive identifiers in your database with a secure, unique identifier

Produce more accurate prospect research results through the utilization of a consistent filter that connects disparate data sources

Access a comprehensive view of your donor with the most relevant information available to enhance critical PII data

Safeguard your valuable donor data against the risk of identity theft by replacing sensitive identifiers, including Social Security or driver's license numbers, with LexIDSM. A patented, advanced linking technology, LexID, created by data leader LexisNexis[®], assigns a unique and persistent identifier to a consumer identity.

THE LEXID APPEND PROCESS

Leverage the power of LexisNexis and the nation's largest database of proprietary consumer information to enhance the overall quality and performance of your donor data, beginning with a LexID append. Created to identify intersecting data points in their compilation process, LexID provides your organization with a secure donor identifier not derived from sensitive, personally identifiable information.

The LexID append process begins with the submission of your data file to AlumniFinder. The following fields are required: First Name, Last Name, Address, City, State, and Zip Code. Additional input criteria, which may result in better matching, can also be included (Middle Name, Home Telephone Number, Date of Birth, and/or Social Security Numbers). Once added to your database, use of the LexID extends to your prospect research and future batch updates.

IMPROVE PROSPECT RESEARCH

When engaging AlumniFinder Online for your prospect research, simply choose the desired search and enter the donor's LexID. AlumniFinder Online utilizes the LexID to access all associated data, which provides you with accurate search results and comprehensive reporting in a minimal number of steps.

ACCESS RELEVANT CONTACT DETAILS

When the time comes to update your donor data en masse, the LexID serves as the matching mechanism for AlumniFinder to identify your constituents within the LexisNexis dataset. Once the donors are identified, numerous batch appends including address updates, name changes, cell and landline telephone numbers, dates of birth, and/or dates of death can be performed in one simple pass.
